DKL - KRE200

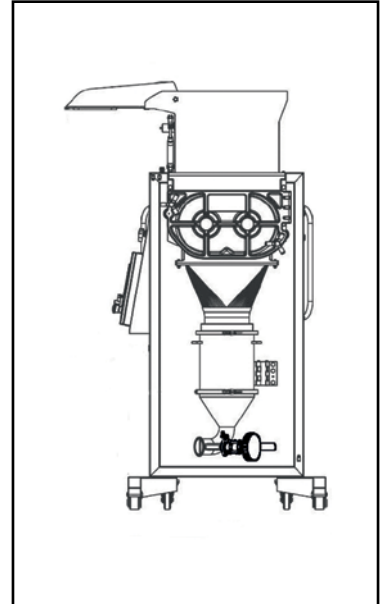

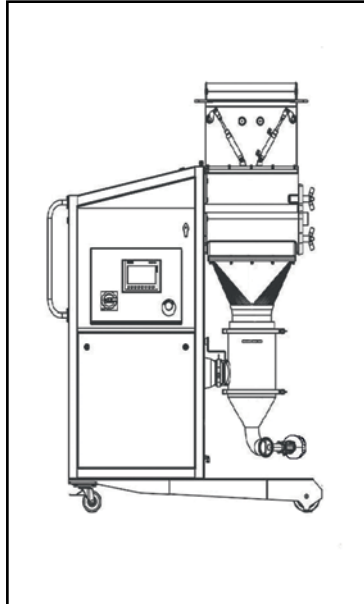

General Technical Information

DKL-KRE200 crushes the pharmaceutical raw material in block form with knives and then pulverises it into powder by reducing it to various sizes with replaceable grater/sieve.

- Product inlet hopper size maximum 400 x 400 x 300mm
- Machine maximum dimensions 2090 x 1510 x 1270mm
- Product feed motor (Asynchronous) 1390Rpm, 0.75kW
- Observable crusher chamber with 38 blades
- Double piston product inlet chamber
- Crusher blade speed 20-40Rpm
- Crushing knife motor (Asynchronous) 2880Rpm, 4kW
- Grater/sieve blade 1750-4000Rpm
- Replaceable grater/sieve
- Movable portable cabin

DKL - KRE200

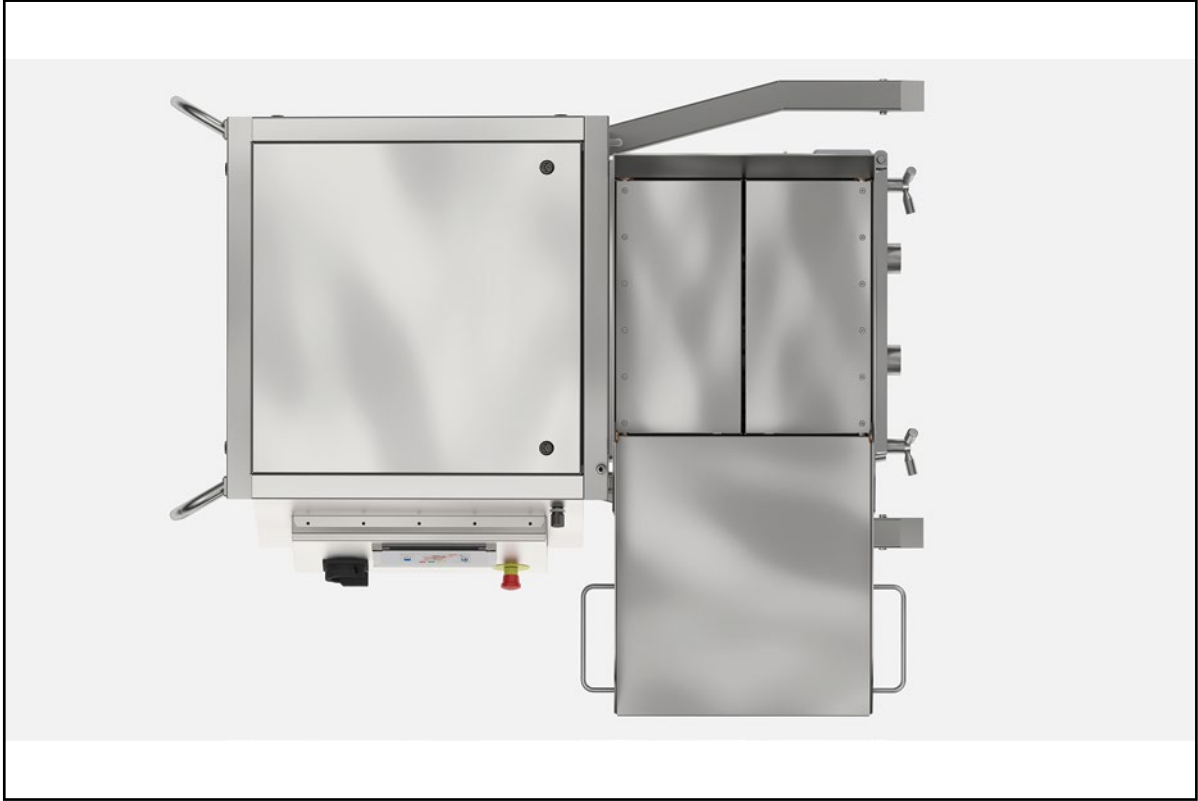

- The metals used are made of 316L stainless steel.
- The digital display has an easy-to-use interface.
- The pharmaceutical raw material in the form of logs can be conveyed to the crusher blade and pulverised in different sizes with sieves / screens with different gaps.

Crusher Grater / Sieve Machine

- The drug movement sections are connected to the modular structure with removable fasteners.
- Connection of modular sections is provided with magnetic safety sensors.

DKL - KRE200

- Log drug can be loaded easily with opening/closing lid. Automatic opening/closing double cover can be easily opened/closed with the valve lever and poured into the log drug crushing section.

- Sections are secured with magnetic sensors for the realisation of working conditions.

Crusher Grater / Sieve Machine

- The crusher blade is hidden in a protected cabinet.
- The crusher blade cabinet is protected by sensors.
- With removable and replaceable crusher blade and sieve, different sizes of powder product can be obtained.

DKL - KRE200

- The systems in the cabin and hopper are mounted with clamps and fasteners.
- The amount of product to be crushed and the size of the dust can be changed by adjusting the crusher blade and grater / sieve rotation speed.
- It is designed in dimensions that can pass through the doors between rooms.

Crusher Grater / Sieve Machine

- The machine can be stopped in case of emergency with the EMG button.
- The movable cabin can be operated safely and stably with lockable wheels.
- Limited access to the engine compartment is provided with the keyed cab cover.
